

Transportation

1. Because of budget cuts my district is reducing transportation to all students, general and special education. Is this legal? (2009 Summer)

If a special education student's IEP states that one of the services to be provided is transportation, it has to be provided. However, there are many more questions about this issue that can be clarified by the Special Education Transportation Guidelines.

Education Code 41851.2 required the State Superintendent to develop special education transportation guidelines for use by IEP teams that clarify when special education services are required. For more information go to <http://www.cde.ca.gov/sp/se/sr/trnsprtgdlns.asp>.
